

iPhone 6/7 Mute Function Setup Instructions

The Juggernaut Bumpr for iPhone does not provide access to the physical mute switch.

These instructions show how to set up an on-screen mute button.

1

Go to Settings ->General ->Accessibility ->AssistiveTouch

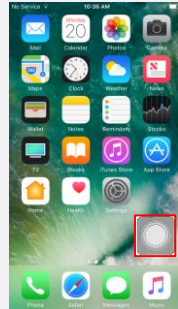

4

Select "Mute", then "Done". Press the Home button

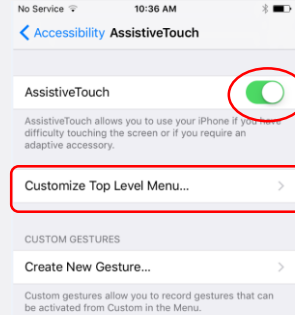

5

There will now be a new on-screen button. Drag to re-position.

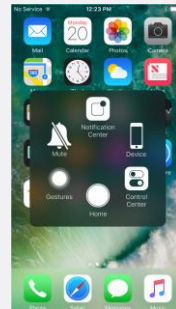

2

Turn AssistiveTouch On
Then go to -> Customize Top Level Menu

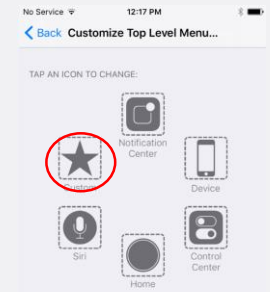

6

Tap to display options.
Tap mute to mute/unmute the device.

3

Tap "Custom"

7

This function can be turned on/off in the AssistiveTouch menu
