

## Juggernaut.Case™ Quick Disconnect Door Installation

**1** inspect blue seal on door for any potential contaminants

**2** hinge (opposite of the thumb screw) should be closed and have screw threaded through

**3** attach door with the thumb screw facing towards left side of case

**4** while holding down the seal securely and tighten thumb screw half way

check that screw is threaded through hinge (see step 2)

do not over tighten any screws on door

only assemble door in a clean, dust-free environment

door securely fastens in one direction because of the design

**5** once thumb screw is started, use included tool to get opposite screw hand tight

**6** finish tightening thumb screw

**7** check that Quick Disconnect Door is securely attached

**8** insert device micro-USB end first into case, then close and latch door
